

## » Dedicated servers with WebDeal

WebDeal AS can offer dedicated server systems custom-made for each customer – ranging from operation of huge portal solutions with complex services to simple servers with web and small databases.

A large segment of services and a staff with expert knowledge of various server architectures gives us a broad scope over a range of multiple technologies. We can help your company to choose systems that are cost-effective and stable.

### Security and safety

- World class physical security and monitoring
- Focus on data security
- Routines for handling crises and service interruptions
- Extra monitoring of the services by special agreements
- Redundant Internet access
- Powerful backup systems

### Competence

- Ability to communicate at the customer's level
- Employees with solid knowledge and superlative education
- Formal certifications
- Broad experience in different operational environments
- Solid references

### Server systems

- Standardised hardware from well-known suppliers
- Focus on stability and maintenance
- Possibility to extend onsite agreement
- Scalable solutions based on your demands and wishes

### Availability

- Direct access to our technicians in addition to our usual support
- Technical staff available by telephone 24/7
- Totally remote-controlled server park

Web sites, databases, e-mail, intranet, document storage, groupware and large portal solutions are a few keywords related to our dedicated systems. Agreements of operations can be made independent of where the server systems are located.

WebDeal can help you to choose a platform considering existing infrastructure and architecture.

Large and small companies have chosen us as their partner because of the high quality of our services.
